INTRODUCTION

MICS understands the importance of quality assurance and quality control within the critical activities of the oil and gas industry.

With over 20 years experience in the Mozambique oil and gas sector, covering both pipeline installations and plant construction, MICS has developed a highly trained team of experienced Inspectors in servicing our clients high quality requirements, often in demanding and difficult circumstances.

Having provided sub-contract services to existing oil and gas multinationals and EPC's within Mozambique since the early 2000's, MICS was incorporated in 2021 as a +51% Mozambique indigenous company employing locally trained and certified inspectors to promote the capabilities of a Mozambique owned company providing Mozambique engineered service solutions.

Headquartered in the province of Inhambane, MICS operates from sites in Matola, Pemba, and Palma

OUR TEAM

The MICS team of highly experienced Mozambican nationals have a combined experience spanning more than 26 years on oil and gas projects in Mozambique.

From humble beginnings as sub-contractors to various projects in Mozambique, the MICS team has grown from applicators and internal quality control personnel to what is now the only Mozambique inspection company operating with

fully trained and Internationally accredited inspectors, providing quality management services for welding and corrosion protection applications.

We take our team to your project, providing relocation and "on site" interrogation on all aspects of inspection.

OUR CULTURE

Our business is to give our clients the very best that we are capable of. We recognise that our clients expect MICS to understand the environment, recognise the challenges and execute the objectives.

As providers of a professional service, we align ourselves with like minded partners who will provide the support and service our clients expect from us.

The responsibility for efficient project execution starts with MICS, and our staff is committed to produce to the expectations of our clients.

MICS' responsibility is to perform within the standards and expectations of our clients, providing surveillance and ensuring Integrity of project objectives.

OUR COMMITMENT

- 51% owned by Mozambique Indigenous Citizen;
- Investment into training and development;
- Alliance with internationally accredited inspection and coating training authority;
- Deployment on project sites throughout Mozambique;
- Development of local community work forces;
- Establishment of training facilities near site on all projects;
- Gender equality to achieve 25% female workforce;
- Supplier of testing and measurement equipment.

INSPECTIONS

- MICS understands the importance of quality assurance and quality control and therefore only offer highly experienced Inspectors to service our clients to ensure conformance to quality requirements throughout any given project.
- MICS provides seasoned Inspectors with significant experience specializing on large oil and gas projects.
- MICS inspectors are certified by the relevant international agencies, providing a diverse range of competencies in the various inspection and training disciplines within the oil and gas industry.
